The third column "**Description**" represent the part description i.e., name of the part.

The fourth column "**Qty.**" represents the quantity of the part used in that assembly.

The fifth column "**Interchangeability**" represents parts interchangeability concept.

The sixth column "**Cut off**" represents the chassis number of tractor from which part is used.

The seventh column "**Remarks**" represents the any special comment for that part.

INTERCHANGEABILITY CONCEPT

As improvement is a continuous process in order to give the best performance for your tractor changes are done in the component. In order to facilitate our customer that whether the previous part can be replaced with the new one or not, nomenclature is done for this purpose.

e.g.

10002341AA

10002341AB

10002341AC

If the first alphabet of the part i.e. "A"(10002341AA) does not change and second alphabet change then as in part 10002341AB from "A" to "B" then the parts are interchangeable i.e. the latest revision means this is better version of the same part.

Also if the first alphabet of the part i.e. "A" (10002341AA) changes from "A" to "B" (10002341BA) then it means both cannot be interchanged whenever the first letter changes then interchangeability with the previous revision vanishes.
